EDUCATION

[Kamuzu Academy]

[2016] – [2021]

Completed secondary education with exposure to Information and Communication Technology (ICT). Gained foundational understanding of web development concepts including HTML and basic programming principles. Worked with drag-and-drop web design tools as well as introductory coding exercises, which provided early experience in building and structuring simple web pages. Participated in extracurricular activities that helped develop teamwork, leadership, and problem-solving skills.

[Malawi Collage of Accountancy] (Business Management)

[2022] – [2023]

Developed strong analytical, communication, and problem-solving skills. Gained understanding of business systems, organizational processes, and decision-making frameworks that support structured thinking useful in software development environments.

[Data Camp]

[2024] – [2025]

Completed hands-on training in Python, SQL, and data analysis. Built foundational skills in working with datasets, database queries, and data-driven problem solving through practical exercises and mini-projects

[University of Malawi - UNIMA]

[2023] – [2028]

Currently pursuing a Computer Science degree with focus on software development, algorithms, databases, and system design. Actively building practical experience through projects in backend development, APIs, and data handling.

WORK EXPERIENCE

[Panorama General Supplies] [Sales Person]

[2016]– [present]

I work in a customer-facing environment that has strengthened my communication, problem-solving, and adaptability skills. I assist customers and support daily operations in a fast-paced setting. This experience inspired me to start developing a sales and inventory tracking system called “Stock Master”, aimed at improving stock visibility, organization, and efficiency in small business environments.

[Youtopia] [CEO]

[2024] – [Present]

Founded and manage a clothing brand with complete social media presence. Engage with followers and build online community. Develop and execute social media strategies to build brand awareness.

SKILLS

- Nestjs
- TypeScript/JavaScript
- SQL
- Python
- Database design and implementation
- C++
- Git/GitHub
- Team work spirit
- Microsoft office
